

Dhanshri Chawhan

AI/ML ENGINEER

+91 9518311686 · dhanshrichawhan@gmail.com

linkedin.com/in/dhanshri-chawhan · github.com/dhanshri-chawhan

PROFILE SUMMARY

AI/ML Engineer with 4 years of experience in Python, cloud platforms (AWS, Azure), and CI/CD. Skilled in Generative AI, LLM integration, and machine learning model development with expertise in data preprocessing, feature engineering, and MLOps for scalable, high-performance solutions.

SKILLS

- Programming & Frameworks:** Python, JavaScript, Java, Node.js, ReactJS
- AI/ML:** Generative AI, LLM Integration (OpenAI API), Prompt Engineering, Model Training & Evaluation, Feature Engineering, NLP, Deep Learning, TensorFlow, PyTorch, scikit-learn
- Cloud & MLOps:** Azure (Function Apps, Blob Storage, OpenAI Services), AWS (EC2, ARM Instances, Networking), Docker, Kubernetes, CI/CD, Jenkins, ML Model Deployment
- Databases & Data Engineering:** SQL, NoSQL, Data Pipelines, JSON
- Developer Tools:** Git, GitHub, VS Code
- Operating Systems:** Linux, Windows

EXPERIENCE

Accenture Solutions Pvt. Ltd.

GenAI Project | *Python, GenAI, Prompt Engineering, Azure Services*

May 2024 - Present

- Developed AI-driven solutions for legal document analysis, improving risk identification efficiency by 70%.
- Implemented Azure Function Apps, Blob Storage, and OpenAI APIs, creating a scalable backend that reduced system latency by 40%.
- Developed modular components, including Document Upload, Legal Extraction, and Knowledge Base modules, boosting development agility.
- Conducted rigorous prompt testing on real-world legal documents, enhancing AI accuracy and consistency by 60% through iterative refinements.
- Optimized prompt design and text chunking strategies, increasing LLM comprehension accuracy and risk detection precision by 50%.

Software Defined Vehicle | *Embedded Systems, AWS, Jenkins*

Apr 2022 - Feb 2024

- Engineered a virtual CAN interface on Linux to enable Android image flashing on Raspberry Pi devices, cutting manual setup time by 60%.
- Managed AWS ARM instances and fine-tuned network configurations, increasing infrastructure security and stability.
- Automated build and deployment pipelines using Jenkins and CI/CD practices, reducing release turnaround time and minimizing deployment errors.
- Configured MTK portal and gRPC services on cloud infrastructure to streamline team testing and development.

- Created and executed 100+ E2E and automated test cases, improving device testing reliability and reducing QA cycle time.
- Identified and reported critical bugs using JIRA, improving issue resolution efficiency and enhancing release quality.
- Crafted and validated REST API requests/responses in JSON to ensure seamless integration and robust data flow in satellite messaging systems.
- Documented detailed bug reports and testing insights, enabling reproducible test scenarios and better collaboration with developers.

EDUCATION

Government College of Engineering, Nagpur

Aug 2017 - Aug 2021

Bachelor of Engineering, Computer Science Engineering
CGPA - 8.85

CERTIFICATIONS

- AI- 102 Azure AI Engineer Associate (2025)
 - Github Copilot GH-300 (2025)
-
